NATCHITOCHEES 9-1-1 EXPLORES GRANT OPPORTUNITIES

The Natchitoches Parish Communications District (Natchitoches Parish 9-1-1) sponsored a grant strategy workshop on October 4th. Mr. Scott Landau who is Director of Business Strategy, at Motorola Solutions and a member of the Government Projects Funding and Policy Team, led the workshop which was attended by members of 9-1-1 Board of Commissioners. The focus of the workshop was helping the communications district gain a greater understanding of Federal and State grant funding processes in general, and specifically to gain better insight into grant opportunities, which are available for public safety communications projects.

“The development of a consolidated emergency communications and operations center and the expansion of parish-wide public safety radio communications are among the improvement projects currently being explored by the District. It’s not surprising that funding is a critical element to the success of both of these projects.” ... said Willis Carter, 9-1-1 Director for Natchitoches Parish.
